

VIASURE

Adenovirus Real Time PCR Detection Kit

Pathogen and product description

Adenoviruses belong to the *Adenoviridae* family of non-enveloped and double-stranded (dsDNA) viruses. There are 51 immunologically distinct Human Adenovirus (HAdV), even though the serotypes 40 and 41 which belong to specie HAdV-F are mainly cause of gastroenteritis. Nevertheless, the serotypes 1, 2, 5, 6, 12, 18 and 31 are also occasionally associated with acute diarrhea.

VIASURE Adenovirus Real Time PCR Detection Kit is designed for the diagnosis of gastroenteritis caused by Adenovirus in human stool samples. After DNA isolation, the identification of Adenovirus is performed by the use of target specific primers and a fluorescent-labeled probe that hybridizes to a conserved region with the *hexon* gene.

Analytical sensitivity

VIASURE Adenovirus Real Time PCR Detection Kit has a detection limit of ≥ 50 viral DNA copies per reaction

Dilution series of Adenovirus (10^7 - 10^1 copies/rxn) template run on the Applied Biosystems 7500 Fast Real-Time PCR System
