Entamoeba dispar Real Time PCR Detection Kit

Pathogen and product description

The genus *Entamoeba* comprises six species that live in the human intestinal lumen. Although *E. histolytica* is the only one recognized as a pathogen, the ability of the other species to cause disease is unclear. In fact, specific strains of *E. dispar* have been associated with non-dysenteric human colitis and amoebic liver abscess, therefore the non-pathogenicity of *E. dispar* is questionable.

VIAUSURE *Entamoeba dispar* Real Time PCR Detection Kit is designed for the detection of *Entamoeba dispar* in human stool samples. After DNA insolation, the identification of *Entamoeba dispar* is performed by the use of target specific primers and a fluorescent-labeled probe that hybridizes to a conserved region with the 18S rRNA gene.

Analytical sensitivity

VIASURE *Entamoeba dispar* Real Time PCR Detection Kit has a detection limit of ≥ 10 DNA copies per reaction

Dilution series of *Entamoeba dispar* (10^7 - 10^1 copies/rxn) template run on the Bio-Rad CFX96 Touch™ Real-Time PCR Detection System
